ABOUT ME

Backend Software Engineer with strong foundations in algorithms, data structures, and system design, experienced in building scalable APIs, **data processing workflows**, and **cloud-native backend systems**. Skilled in Python, Golang, SQL, Docker, AWS, and REST APIs, with a strong interest in DevOps. Focused on writing clean, testable code and collaborating with multidisciplinary teams to build reliable, scalable, and maintainable software systems.

WORK EXPERIENCE

RARA LABS

Kathmandu, NP

Backend Developer

Jan 2026 – Present

- Developed a financial reconciliation system for banks and financial institutions, reducing manual reconciliation work from approximately 80 hours to minutes through config-driven, no-code, automated data ingestion, processing, matching, and report generation.
- Eliminated OOM failures by redesigning data processing workflows to use streaming and bounded-batch processing, achieving stable, constant-memory execution.

LIPI POINT

Bhaktapur, NP

Backend Intern

Sep 2024 – Jan 2026

- Designed and built an OSINT-enabled news aggregation system capable of ingesting, categorizing, and surfacing publicly available information from diverse open-source sources to support real-time monitoring and intelligence workflows.

MP SUMANA SHRESTHA SECRETARIAT

Kathmandu, NP

Digital Communications Intern

Jun 2024 – Sep 2024

- Drove digital growth strategies for in-house brands and clients
- Created and edited visual content across video and graphic mediums

EDUCATION

AMRIT SCIENCE CAMPUS, TU

Kathmandu, NP

Bachelor of Computer Science and Information Technology

Expected March 2026

Current Score: 76%

Completed major coursework; available for full-time employment.

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, SQL, Golang

Backend & APIs: FastAPI, Django REST Framework, Flask, REST APIs

Cloud & DevOps: AWS EC2, AWS S3, Docker, Linux, Git

Data & Integration: Data ingestion, batch processing, streaming workflows, RabbitMQ

Methodologies: Agile/Scrum, code reviews, debugging, testing

SELECTED PROJECTS

HTTP Server (TypeScript + TCP)

November 2025

- Engineered an asynchronous, non-blocking HTTP server from scratch using TypeScript and raw TCP sockets, bypassing high-level frameworks like Express to optimize overhead.
- Implemented custom request parsing and connection pooling, successfully handling concurrent client requests with low latency.

HACKATHONS: Runner Up in Softwarica Code Fest, 1st Runner Up in Asian Hack, Top 10 in DeerHack.
